

Resource Name	Naga Surendra Gurijala
Team	Development
Position	Software Engineer

Professional Experience

- Having 5.2 years of extensive experience in Software Design & Development and Delivery Management for large projects.
- Having technical and functional experience in development of Object-Oriented applications built on Microsoft related technologies.
- Developed web-based application using C#, ASP.NET, ASP.NET Core WEB API's, Visual Studio 2022, SQL Server, Microsoft .Net Frameworks, Java Script, JQuery.
- Developing front-end web pages using HTML, CSS, Bootstrap. Java Script, JQuery, ReactJS, Micro Frontend ReactJS.

Technical Skills

Technologies	C#, ASP.NET, MVC, WEB API , Blazor,Razor
UI Technologies	HTML, CSS, Bootstrap, ReactJS, Micro Frontend ReactJS.
Databases	MS SQL Server 2019.
IDE	Visual Studio 2022, Visual Studio Code, RubyMine.
Scripting Languages	JavaScript, JQuery.

Education

- Bachelor of Technology in Electrical and Electronics Engineering from Vignan's Lara Institute of Techonology, Guntur.
- Intermediate in Sri Chaitanya Junior College
- SSC in Sri Vivekanada High School.

Technical Experience:

PROJECT 1:

Project Title	Financial Application
Duration	05/10/2019 – 31/05/2024
Location	Hyderabad
Programming Languages	C#.NET,Razor
tools/technologies / framework	.NET Core,Web APIs, SQL Server,HTML, CSS,React Js
Operating Systems	Win-10

CLIENT DESCRIPTION:

This product is an australian based financial planning software. It is

Used to organize user work by dividing and schedule through a step-by-step process. It is easy to

Track the status of simple functionality of financial agents.

ROLES AND RESPONSIBILITIES IN THE PROJECT:

- Involved in meetings for design specifications and requirements gathering with the Business Team.
- Involved in development and Testing of Web APIs and web applications in .Net core

- Understood existing functionality and made changes accordingly. Added language keys to database.
- Fixed existing functionality issues.
- Having idea in web technologies, JSP, JavaScript, HTML and CSS, React JS.

- Having hands on experience in data base retrieving structured query languages SQL using MS SQL Server
- Specially trained at C#.NET, LINQ and ADO.NET
- C#.NET well known to use OOPS concepts and basic principles of c-sharp. And few concepts like send emails using c#, PDF or Excel formats using C#.
- ASP.NET MVC, well known to MVC architecture.
- ADO.Net, have a good knowledge at CRUD operations using ado.net, Connecting database and calling stored procedures.
- Worked on project which build on advanced architecture using ASP.Net MVC 5 with Entityframework core
- It is a client-side scripting language which build by MVC architecture. It is a richest scripting technology with more powerful built-in functions and widgets.

TECHNOLOGIES USED IN THIS PROJECT:

- Framework used is .NET core.
- Database used is SQL server.
- Business logic is written in C#.Net .

DURATION OF THE PROJECT: 5.2 Years

Project 2:

Project Title	Retail Service Application
Duration	30/06/2022 - 30/05/2024
Location	Hyderabad
Programming Languages	C#.NET
Technologies / Framework/ Tools	.NET Core WEB APIs, Kendo UI, SQL Server, Oracle, HTML, CSS, ReactJS, Cucumber Test cases, Jest Test cases, NUnit test cases, Visual Studio 2022, Visual Studio Code, RubyMine, GitHub.
Operating Systems	Win-10

CLIENT DESCRIPTION:

It is a retail service application. It is used to maintain and log the service information about assets. It is providing software for coffee shop owners to save and retrieve their asset related information.

ROLES AND RESPONSIBILITIES IN THE PROJECT:

- Involved in meetings for Design specifications and Requirements gathering with the Business Team.
- Involved in Development of Web Applications using .Net core, ReactJS, KendoUI and Testing of Web Applications using Cucumber test-cases in RubyMine, Jest test-cases in ReactJS.
- Understood existing functionality and made changes accordingly.
 - Fixed issues with the existing functionality.
 - Writing unit test cases for the development made.

TECHNOLOGIES USED IN THIS PROJECT:

- Framework used is .NET core.
- Database used is SQL server, Oracle.
- Business logic is written in C#.NET.

DURATION OF THE PROJECT: 2 Years
